

## Jim Smith

President | PowerSecure

Jim Smith serves as the president of PowerSecure, the nation's leading distributed energy innovation company.

As an experienced executive in the field of distributed energy resource (DER) solutions, Smith oversees the company's rapidly expanding microgrid business and its fleet of over 2 gigawatts of installed systems, which boasts a leading 98%+ reliability rating in the U.S.

Prior to his previous role, Smith served as the chief operating officer and served as president of energy efficiency services at PowerSecure from 2013 to 2018. In that position, he was responsible for delivering top-tier solutions in lighting, controls, water conservation, building envelope, mechanical/electrical upgrades and renewable energy to reduce energy costs, improve operations and provide the best life cycle cost.

Smith was executive vice president and group president of Lime Energy, a national clean energy solutions provider, from 2004 to 2012. From 1998 to 2004, he served as director, engineering and operations for Ameresco Inc., an independent energy services provider. Prior to that, Smith worked for Duke Solutions, a subsidiary of Duke Energy and Burlington Industries.

Smith began his career with Burlington Industries, where he worked for eight years in engineering, service and operations with overall responsibility for multiple large industrial and manufacturing facilities in the Southeast before joining Duke Solutions.

Smith holds a Bachelor of Science degree in electrical engineering from North Carolina State University as well as numerous licenses and certifications in construction, engineering, project management and safety.
