

# Scott Kolek

SVP, Manufacturing for Distributed Infrastructure | PowerSecure

Scott Kolek is senior vice president of Manufacturing at PowerSecure.

In this role, Kolek leads the manufacturing, supply chain, new product development, product management and project engineering groups and holds responsibility for the cost, quality and delivery of all in-house manufactured equipment.

Kolek joined PowerSecure in 2018, bringing over 30 years of experience in power generation. He has a strong background in product management, engineering and manufacturing.

Throughout his career, Kolek has led the development and introduction of innovative new products and driven the operational excellence and process development necessary to improve profits and deliver sustainable growth. He has also successfully transformed businesses and manufacturing processes from low-volume, highly customized products to higher-volume, standardized products.

Prior to joining PowerSecure, Kolek served as senior vice president and general manager of 3Pi, a manufacturer of generator sets, switchgear and control solutions for critical power backup and utility grid-interactive applications. Before joining 3Pi, he held engineering management roles at Cummins Power Generation in the U.S. and Europe and product and sales management roles at GE Industrial in the U.S. and Asia.

Kolek holds a Bachelor of Science in electrical engineering from the University of Minnesota.
